

Question 1

Calculate the area of each triangle and parallelogram.

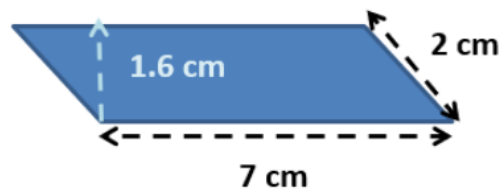

Question 2

Elizabeth is calculating the area of this parallelogram.

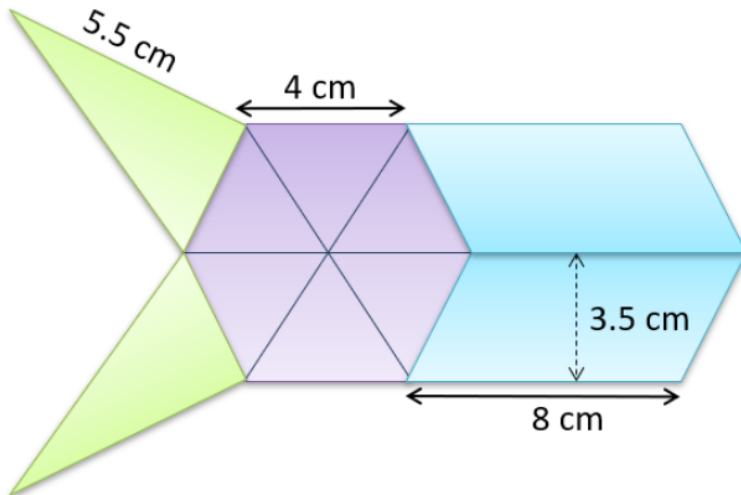

She says:

I measured the two sides and found they were 7 cm and 2 cm. The area is 14 cm^2 .

Elizabeth is incorrect. Why?

Question 3

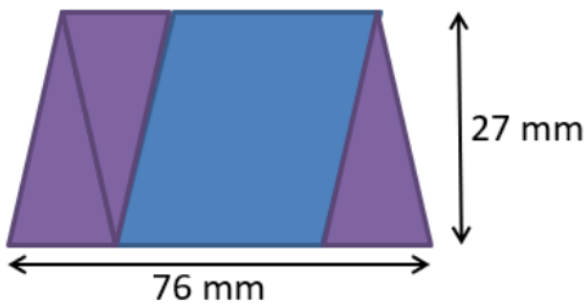

Ronaldo draws a design of a fish using 6 congruent equilateral triangles, two identical right angle triangles and two identical parallelograms.

What is the area of the design?

Question 4

This trapezium is made of three isosceles triangles and a parallelogram. The base of one triangle is 12 mm.

What is the area of the trapezium?

Question 5 CHALLENGE

Question 5

A jewellery designer makes a pendant using a triangle with a smaller triangular hole in the middle.

The hole has an area a quarter of the whole pendant.

What is the area of the pendant?
