

## *Look at the grow!*

*(Science - Spring 2)*

*In science this half term we will be exploring how plants grow. This week we would like you to get outside in your garden or local environment and look for plants and flowers that are growing. You may like to take photographs of what you notice or draw them in the spaces below.*

*Draw examples of the plants you see.*

What changes do you think will happen over the next few weeks? Why do you think that?

Here is a clip to help you to consider what you have seen when you are outside.
