

Home Learning Adventure Pyramid- Growing

Analyse

- What is the difference between fruit and vegetables?
- Are there different types of apples/pears/melons etc? what are they called?

Evaluate

- What is your favourite type of fruit/vegetable and why?

Create

- Create a recipe for your favourite meal using different fruits or vegetables

Apply

Can you visit a 'pick your own' and find out about where vegetables and fruit come from?

- Can you make a vegetable soup or fruit salad?
- Can you peel/chop fruit and vegetables safely? Can we eat all of the fruit/vegetable or do we put some of it in the compost bin?
- Can you grow a sunflower at home?

Understand

How do we make chips?

How do we care for living things (plants) ?

How many different fruits or vegetables can you name?

Remember

- Where do different types of fruit/vegetables come from?
- Can you find some information on growing plants/vegetables

Top tips!

You don't have to complete this pyramid all in one go; go with the interests of your child and dip in and out of this pyramid as you wish. Some parents have chosen to create a project or presentation over several weeks of home learning based on this context which is great but please don't feel like this is what we expect. It is there to provide you with **ideas** based on our topic...feel free to make up your own activities or games! Please try to make a note or present work in the home learning adventure books which are reviewed every Friday.
